

finops maturity assessment

Where are you on your FinOps journey and what next?

the challenge

FinOps is a fast moving practice that is also new to many, without a clear roadmap and continuous improvement framework many organisations struggle to achieve expected returns. In fact, FinOps assessments have recently been added to the FinOps Foundation Framework due to the challenge this brings.

Knowing where to start or even where to go next can be very challenging. As such it's imperative to get an independent view from an experienced organisation on where the current FinOps practice sits in terms of maturity and how to proceed to make the most out of investments in this space.

the service

FinOps is an ongoing practice, that revolves around a cycle of assess – optimize – operate all of which have their own requirements and skillsets for successful delivery. These step through 3 maturity phases; crawl, walk and run. Organisations often make the mistake of trying to run too soon, while a gradual iterative approach is where best results are found.

As organisations drive to adopt FinOps, they often hit challenges that can be difficult to overcome. Synyega, working within the FinOps Framework and FinOps Foundation lenses, with our team of certified practitioners and professionals have developed a range of services to help an organisation no matter where they are on their FinOps journey.

service benefits

- Clarifies maturity position
- Prioritised guidance & roadmap
- Solid foundation for growth
- Promotes cultural adoption
- Proactive journey management
