

# finops roadmap accelerator

**Fast track your FinOps journey with Synyega**

## the challenge

It's one thing getting started in FinOps, getting those first reports together and starting to optimise and reduce cost. The next challenge is how do you keep improving to drive your practice forward and find more and more value from the cloud? This requires a detailed roadmap and specialist expertise to continue the organisations journey through that roadmap.

## the service

Synyega understands that FinOps is a journey, not a one off exercise and adoption of a culture and framework takes time. As such Synyega have put together a FinOps Roadmap Accelerator service to drive the FinOps programme forward across your organisation. The aim is to support the creation and development of your FinOps function with the aim to make them self-sufficient and successful.

Designed to support across the FinOps Framework, the Roadmap Accelerator takes the assessment of FinOps Maturity and drives the organisation forward in developing the FinOps Practice directly impacting the Manage the FinOps Practice domain, but also targeting other capabilities as required. This service combined with our Cloud Commit and Software Marketplace Advisory, creates a powerful engine to deliver the very best value from the cloud.
