

greenops health check

Identify your carbon reduction opportunities & take action

the challenge

Organisations are becoming increasingly interested and pushed to show that they are considering sustainability in everything they are doing. Due to the intricacies of the cloud vendors' carbon reporting, it is challenging to get a direct understanding of the cloud's impact on a company's carbon footprint.

the service

Our GreenOps Healthcheck is a deep dive review of Cloud GreenOps and Sustainability in your organisation, to help identify carbon reduction opportunities and includes carbon conscious architectural reviews. Our service kicks off with a series of workshops around process and the development of GreenOps within your organisation.

Your organisation will also understand how to deliver ongoing benchmarking to track its GreenOps position for its cloud estate and how this changes over time, giving direct feedback on how your carbon footprint in the cloud is impacted by decisions taken.

service benefits

- Clarity on present position
- Proactively manage carbon use
- Upgrade your GreenOps
- Consistent GreenOps management
- Expert tooling recommendations

key service deliverables

GreenOps maturity roadmap design and implementation for improved carbon reporting

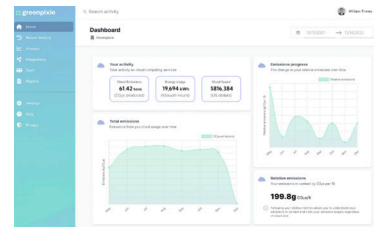

Service includes workshops, tooling, interviews, questionnaires and executive reports

Carbon Unit Economics workshop for bringing CO2e to life is included

Carbon conscious architectural review of multiple workloads, establishing technical context

Uses specialist Cloud GreenOps Tooling for analysis and reporting (GreenPixie)

Sustainability in IT workshops are also available as an option

ENERGY USE	EMISSIONS (Scope 1 & 2)	EMISSIONS (Scope 3)
0.0643 kWh	0.00642 kgCO2e	0.00767 kgCO2e
0.0942 kWh	0.00915 kgCO2e	0.01251 kgCO2e
0.0434 kWh	0.00623 kgCO2e	0.00418 kgCO2e
0.4738 kWh	0.05637 kgCO2e	0.07665 kgCO2e
0.1977 kWh	0.01718 kgCO2e	0.03383 kgCO2e
0.2031 kWh	0.01013 kgCO2e	0.01396 kgCO2e
